ARTIFICIAL GRASS EXPERTS

# TRANSFORM YOUR LAWN WITH TRULAWN

Do you dream of a perfect lawn you can use all year round? Well you don't have to dream any longer! There is an alternative which can transform your lawn into a tidy, evergreen oasis which means no muddy messes in the winter, no brown patches in the summer and no more time spent mowing and carting clippings to the compost heap. That alternative is Trulawn Artificial Grass!

Trulawn offer the complete service, including a free site survey, quote and advice on the perfect grass for your garden. So whether you have kids, pets, prefer a manicured lawn or something slightly longer, we have the grass for you.

We've been operating for over a decade with thousands of installations under our belt in gardens of all shapes and

sizes. Simply put, there isn't a garden we can't transform with a Trulawn! Our teams of experienced and friendly installers work quickly and efficiently to create your dream lawn, with meticulous attention to detail to ensure it lasts for many years to come.

The only thing you'll need to worry about is how you're going to spend all that extra time in your garden...

At Trulawn we pride ourselves on being artificial grass experts. That means:

Bringing you the highest quality and most technically advanced grasses. In fact all our grasses are independently tested to ensure they meet our high standards of performance, durability and colour stability.

Ensuring a first class finish every time; we are passionate about both the Trulawn installation method and our highly skilled in-house team of hardworking installers.

I love my Trulawn! After 3 years it still looks brilliant and has been a saviour after all the rain we've had.

Nancy Laverge

# OUR PRODUCTS

When you first start looking for artificial grass, the choice can seem overwhelming. At Trulawn we will guide you through our market leading product range to help you find the grass that's right for you and your garden...

Not all artificial grass is the same. The quality largely depends on the type of yarn, its density as well as the pile height. Made from 100% polyethylene, Trulawn Luxury is highest quality artificial grass currently on the market due to its realistic appearance, density and technical specification. Artificial grass made from 100% polyethylene has better bounce back recovery so that the blades won't lay flat. The grass is also much softer and will retain its colour better.

## TRULAWN LUXURY

FOR THE TRUE-TO-  
LIFE LOOK

Trulawn Luxury, our personal favourite as well as being our bestselling grass. What sets it apart is its amazingly realistic appearance. It's luxurious and dense and has a 32mm pile height.

.....

### Colour

Olive, dark and lime green blend with a tan thatch

.....

### Pile Height

You don't  
need to be  
green-fingered to  
have a gorgeous  
garden

# OUTDOOR LIVING

Trulawn artificial grass can help transform a standard back garden into a stylish and functional outdoor living area perfect for both relaxing as well as entertaining guests. And with no more mowing required, that means less work and more time for fun.

Our range of grasses work perfectly in both contemporary landscaped gardens and alongside planted borders in more traditional gardens. The grass can also be cut into any shape for more playful garden schemes.

- Trulawn artificial grass won't fade in the sun. All our grasses have been UV stabilised.
- We can install the grass on any surface including; soil, tarmac and paving. It also looks fantastic on decking, roof terraces and balconies.
- It drains just like normal grass.

# KIDS' PLAY AREAS

From tots to teen, all children love to play in the garden. This constant wear and tear can lead to grassy areas becoming worn and patchy not to mention muddy. With a Trulawn you don't need to worry about football fanatics leaving bare patches on your lawn. Kids can play games and sports until their heart's content and your grass will still look perfect 365 days a year.

- All Trulawn grasses are extremely hard-wearing so won't wear down under constant pressure - even if you do!
- We have installed Trulawn grass in hundreds of schools and nurseries across the country.
- All our grasses are soft and make for a comfy landing, but for extra peace of mind especially if you have play equipment in your garden, consider using a shock pad underlay.
- Our artificial grass range is non-toxic.

**My 3 dogs absolutely love the artificial lawn. One of them still kicks his back legs but this causes no damage to the lawn surface at all.**

Beryl Palmer, West Sussex

# PETS

Popular with pet owners, Trulawn is the perfect solution if you're unhappy with discoloured patches on your lawn and muddy paw prints in the house.

Pets love the soft feel of our grasses and because Trulawn grasses have enhanced durability they won't be destroyed by even the most energetic dogs. This is a welcome relief for pet owners whose dogs love charging around!

Dog and other animal mess does not affect the colour of the grass and can easily be cleaned away with warm water and mild detergents.

# PUTTING GREENS

Putting perfection takes practice and what better way to improve your game than with a putting green in your back garden? Trulawn specialise in creating bespoke putting greens that deliver a realistic playing experience.

We are experts at putting green design and can add undulations and elevations for that extra challenge.

## ProPutt

Professional standard putting green that creates a surface that will play smooth and true all year round.

- Tournament quality Nylon surface.
- Used by professional golf designers.
- Offers consistent stimp speed.
- 14mm pile height.

The putting green is superb  
- something the whole family  
can enjoy. personally I am  
hoping it will take a couple of  
shots off my handicap.

Steve Herbert, Kent

# INSTALLATION

To achieve the highest standard of appearance and ensure your artificial grass maximises its life span – a quality installation is essential. We pride ourselves on the excellence of our installations and there are two key factors which distinguish us from some of our competitors.

Preparation of the base is key to the look, stability and drainage of the grass for the years to come, which is why Trulawn, when required, will lay a base of aggregate in addition to sharp sand. Many others only lay a base of sharp sand.

All our grasses are non in-fill grasses so do not require the addition of sand to weigh down the grass. As part of the installation process the entire perimeter is edged using a 2x2 tanalised timber and the grass is then secured with small nails to the timber edging. For more information visit [www.trulawn.co.uk/installation](http://www.trulawn.co.uk/installation)

## — TRULAWN — Guarantee

While we're sure your Trulawn will give you up to 20 years of green grass perfection, for your peace of mind, we offer a grass guarantee of up to ten years that covers fading and degrading, as well as a workmanship guarantee on the installation of the grass of up to two years.

1. Our free installation survey will review the existing lawn and work out levels.
2. To kick things off, first the existing lawn surface has to be removed to a depth of between 60mm and 80mm depending on ground conditions.
3. The entire perimeter is edged using 2x2 tanalised timber to ensure the sub-base material is supported. Cement haunching is used against a patio edge instead of timber.
4. A layer of type 1 limestone is installed to a depth of between 40mm and 60mm.
5. The ground is then compacted using a wacker plate to avoid sinkage and achieve a solid base.
6. A layer of sharp sand is installed to a depth of between 15mm and 25mm, this is then compacted and smoothed off.
7. A durable weed membrane is installed to keep weeds from growing.
8. The grass is then carefully rolled into position across the entire area.
9. Perfect seams, joining grasses are lined up and joined with high strength seaming tape.
10. The adhesive is then spread onto the seaming tape to ensure a tight bond.
11. Next, the grass is gently folded down onto the adhesive.
12. The grass is finally secured with small nails to the timber edge around the perimeter of the garden.
